Past Experience & Delivery Capability Statement

For Prime Contractor Review, Government Subcontract Evaluation, Project Discussion and Client Submission

Registered Office	D-05, 1st Floor, 5/588, Vikas Khand, Gomti Nagar, Lucknow, Uttar Pradesh - 226010
Email	info@asbaetech.in
Website	asbaetech.in
GSTIN	09ACJFA9803E1ZC
Submission Type	Team-level past experience and delivery capability statement
Primary Fit	Government subcontracting, private-sector automation, MIS dashboards, UAT, implementation support

Professional capability submission document for prime vendor evaluation, project discussion and client review.

1. Executive Summary

ASBAE Technologies is a Lucknow-based technology execution company positioned to support prime contractors, system integrators, government departments, public-sector organizations and private enterprises in practical software delivery and implementation work.

The company is supported by a multidisciplinary team with real project exposure in business analysis, enterprise web applications, MIS dashboards, secure role-based systems, banking and lending workflows, fraud and risk analytics, AI/ML-enabled decision support, accessibility testing, QR/inventory systems, API integrations, UAT coordination and workflow automation.

ASBAE is best positioned as a local Uttar Pradesh execution and subcontracting partner for projects requiring documentation discipline, development support, testing, UAT coordination, dashboards, public portal QA and on-ground implementation assistance.

2. Prime Contractor Support Positioning

Support Area	ASBAE Contribution
Local Execution	Requirement collection, department coordination, user feedback, UAT support, implementation assistance and post-deployment support in Uttar Pradesh.
Documentation	BRD, FRD, SRS, user stories, acceptance criteria, workflow notes, test scenarios and handover documentation.
Development	MIS portals, dashboards, admin panels, API modules, database-backed applications, secure modules and workflow systems.
Testing & UAT	Functional testing, API testing, accessibility testing, issue logging, client feedback coordination and sign-off assistance.
Domain Support	Banking/lending workflows, secure systems, fraud/risk analytics, QR/inventory operations and public portal quality checks.

3. Delivery Capability Snapshot

Capability	Practical Relevance
Business Analysis & Documentation	Requirement gathering, BRD/FRD/SRS, user stories, UAT coordination and sign-off support.
Enterprise Web Development	.NET Core, ASP.NET Web API, Angular, React, SQL applications, REST APIs, admin panels and dashboards.
MIS & Reporting	Department dashboards, KPI views, management reports, finance/project tracking and role-based reporting panels.
Secure Applications	JWT authentication, role-based access, secure APIs, audit trails and controlled user permissions.
Fraud, Risk & Analytics	Risk scoring, fraud monitoring, suspicious activity workflows, predictive analytics and automated audit support.
Accessibility Testing	WCAG/ADA audit support, screen reader testing, responsive checks and public portal QA.
QR / Inventory Systems	Asset tracking, QR verification, registration, stock management and operational workflow systems.

4. Business Analysis, Documentation & UAT

The team has practical exposure to requirement gathering, stakeholder coordination, business process mapping, BRD/FRD preparation, functional documentation, user stories, acceptance criteria, Agile coordination, UAT execution, issue logging and stakeholder sign-off support.

ASBAE can support:

- Requirement discovery and process understanding
- BRD / FRD / SRS preparation
- User stories and acceptance criteria
- UAT scenario preparation
- Defect logging and feedback coordination
- Sign-off and handover documentation

Prime value: reduces ambiguity, improves approval flow and supports documentation-heavy government and enterprise projects.

5. Enterprise Web Application Development

The team has hands-on delivery exposure in .NET Core, ASP.NET Web API, Angular, React, SQL Server, MySQL, PostgreSQL, Oracle, REST APIs, Entity Framework, ADO.NET, JWT authentication, Git, Postman, JIRA and Azure DevOps.

ASBAE can support:

- MIS portals and admin panels
- Dashboard and reporting modules
- Backend API development
- Frontend UI development
- Database-backed business applications
- Search, filter, CRUD and reporting modules
- Role-based user management

Prime value: supports development of usable business systems, not only static websites or prototypes.

6. Banking, Lending & Finance Workflow Exposure

The team has domain exposure in loan management, customer acquisition, digital lending, loan lifecycle workflows, regulatory workflows and finance-related systems.

ASBAE can support:

- Loan/subsidy tracking systems
- Beneficiary management platforms
- Customer onboarding workflows
- Finance department dashboards
- Approval and verification flows
- Compliance workflow support

Prime value: useful for projects involving financial assistance, beneficiary tracking, lending workflows, cooperative banking and compliance reporting.

7. Secure Role-Based Applications

The team has exposure to secure application development involving authentication, authorization, secure APIs, role-based access, audit trails, encryption practices and controlled user permissions.

ASBAE can support:

- Secure login systems
- Admin/user role management
- Department-wise access control
- Permission-based workflows
- Audit trail modules
- Secure API modules
- Role-based dashboards

Prime value: supports systems where department users, administrators, auditors and field users require controlled access and accountability.

8. Fraud, Risk & Compliance-Oriented Systems

The team has exposure to fraud and risk-related systems involving transaction monitoring, suspicious activity alerts, risk classification, fraud detection workflows, audit trails, automated auditing and compliance monitoring.

ASBAE can support:

- Fraud monitoring dashboards
- Risk scoring systems
- Audit and compliance dashboards
- Investigator workflow modules
- Case tracking systems
- Data-driven alert systems

Prime value: strengthens suitability for monitoring, compliance, audit and decision-support use cases beyond generic web development.

9. AI/ML, Analytics & Decision Support

The team has practical exposure to Python, SQL, machine learning, fraud detection models, predictive analytics, risk scoring, user classification and automated audit tools.

ASBAE can support:

- AI-enabled MIS dashboards
- Risk scoring modules
- Predictive analytics components
- Fraud analytics modules
- Automated audit tools
- Decision-support dashboards

Prime value: allows ASBAE to support analytics add-ons where scoring, alerts, classification or data-driven reporting is required.

10. Government Application Exposure

The team has exposure to government-related digital application environments, public digital applications, secure application modules, API encryption and government application support workflows.

ASBAE can support:

- Government project module development
- Citizen-facing portal support
- Secure application module support
- Department-level UAT support
- Field coordination in Uttar Pradesh
- Post-deployment user support

Prime value: strengthens subcontract readiness and local implementation credibility for public-sector delivery environments.

11. QR, Inventory, Registration & Operational Systems

The team has practical experience in QR code generation, inventory management, registration portals, SQL databases, role-based authentication, dynamic search, real-time data fetching and workflow automation.

ASBAE can support:

- QR-based asset tracking
- Inventory management systems
- Registration portals
- Field verification systems
- Stock and resource tracking
- Document tracking systems

Prime value: directly useful for department-level operational projects involving stock, assets, records, field verification and office automation.

12. Accessibility Testing & Public Portal QA

The team has exposure to WCAG/ADA accessibility audits, screen reader testing, manual accessibility testing, responsive UI checks, website debugging and cross-browser testing.

ASBAE can support:

- Public portal accessibility review
- Government website accessibility testing
- Screen reader compatibility testing
- Responsive testing
- Cross-browser testing
- Accessibility issue reporting

Prime value: a strong differentiator for citizen-facing government portals, public websites and compliance-oriented frontend quality checks.

13. Project Delivery Methodology

Stage	Execution Method
1. Requirement Understanding	Stakeholder discussions, existing process review, user role identification, workflow understanding, data and reporting requirement capture.
2. Documentation & Scope	BRD/FRD/SRS, functional workflow notes, user stories, acceptance criteria, test scenarios, assumptions and dependencies.
3. Design & Development	Module planning, database design support, API design/development, frontend/backend development, dashboards and role-based access implementation.
4. Testing & UAT	Functional testing, API testing, UI testing, accessibility testing where applicable, issue logging and feedback incorporation.
5. Deployment & Support	Deployment coordination, user training support, documentation handover, post-deployment issue support and enhancement coordination.

14. Prime Contractor Engagement Model

Engagement Mode	ASBAE Role
Local Execution Partner	Support local coordination, implementation, UAT, user feedback and department-side communication in Uttar Pradesh.
Development Support Partner	Support dashboards, APIs, admin panels, MIS portals, reporting systems, QR/inventory tools and workflow automation.
Documentation & UAT Partner	Support requirement documentation, functional specifications, UAT test cases, user feedback, issue logging and sign-off coordination.
Testing & Accessibility Partner	Support manual testing, frontend QA, accessibility audits, screen reader testing and public portal quality review.
Implementation & Support Partner	Support pilot rollout, user training, feedback capture, post-deployment support and enhancement coordination.

15. Best-Fit Project Categories

Category	Best-Fit Projects
Government / Public Sector	MIS portals, department dashboards, beneficiary tracking, loan/subsidy systems, workflow systems, QR asset tracking, inventory systems, citizen-facing portals, accessibility testing, UAT and documentation support.
Private Sector	Business automation, invoice/payment tracking, ticketing/helpdesk systems, admin dashboards, CRM-style tools, employee/travel systems, API integration, QR/inventory systems and data dashboards.
Prime Contractor / MNC Support	UP-based local execution, requirement support, documentation and UAT support, development support, testing and QA, accessibility audit support, department coordination and post-delivery support.

16. Differentiator for Prime Contractors

ASBAE Technologies differentiates itself by combining local Uttar Pradesh presence with practical team-level capability in documentation, full-stack development, banking workflow

understanding, secure applications, fraud/risk analytics, accessibility testing, QR/inventory systems, dashboards, API integrations, UAT and implementation support.

This makes ASBAE suitable for prime contractors that need a reliable local execution partner capable of supporting both technical delivery and client-side coordination.

17. Final Submission Statement

ASBAE Technologies is a Lucknow-based technology execution company with practical team-level delivery experience across business analysis, enterprise software development, MIS dashboards, banking and lending workflows, secure role-based applications, fraud and risk analytics, AI/ML-enabled decision support, government application exposure, accessibility testing, QR/inventory systems, API integrations, UAT coordination and workflow automation.

The company is positioned to support prime contractors, government departments, public-sector organizations, private enterprises, MNCs, startups and SMEs through software development, documentation, testing, UAT coordination, dashboard development, secure application modules, accessibility support, API integration and local implementation assistance across Uttar Pradesh.

ASBAE Technologies is especially suitable as a local execution and subcontracting partner for government and enterprise technology projects requiring reliable development support, documentation discipline, UAT handling, dashboard/MIS capability, public portal QA and on-ground coordination in Uttar Pradesh.
